

Flowguard HB Primer

PRODUCT DATA SHEET

Description

Flowguard is a twin pack, surface tolerant, high solids, epoxy flake filled primer with exceptional corrosion protection on mild or galvanised steel.

Recommended Uses

Anti-Corrosive primer for steel structures and galvanized steel, particularly where blast cleaning may not be possible. Good corrosion protection in salt and fresh water. Can be used alone as a coating system or over coated with a Flowcrete top coat system selected for a specific environment.

Advantages

- Surface tolerant.
- Excellent corrosion resistance.
- High build
- Very good water resistance.
- Good solvent resistance.
- Good chemical resistance.
- Very good abrasion resistance.

Surface Preparation

Power tool cleaning to St2. Mill scale free (ISO8501-1:1988/SS05 59 00). Improved surface pre-treatment will improve performance. When used over old coating systems, the surface must be clean and dry.

Mild Steel – dry blast to a new white metal in accordance with ISO8501 SA $2\frac{1}{2}$ to obtain a 25 to 50 micron blast profile.

Application

Allow a 2 minute induction period after thorough mixing of two components. Apply by brush, roller or airless spray, one coat at a typical application rate of $5m^2/\ell$.

A minimum over coating time of 6 hours at 25°C should be observed. When over coating after extended exposure, ensure surface is free of chalking and other contaminants before over coating.

Health & Safety

Some of the components of this product may be hazardous during mixing and application. Please consult the relevant Health & Safety Data Sheet available from Flowcrete on request and sent with each delivery.

Properties

No of components: 2

Mixing Ratio:

Ep: Act by volume 4:1
Pot Life at 25°C: 2 hours

Drying Time:

Touch Dry 4 hours
Practical Cure 10 hours
Full Cure 7 days

Apply by: Brush, roller or airless spray

Theoretical Coverage: $6m^2/\ell$ Dry Film Thickness @ $6m^2/\ell$: 115 microns

Recommended N° of coats:

Overcoat Time @ 25°C:

Min 7 hours Max None

Application Temperature:

Min 10°C Max 30°C

Total Solids: 80%

Thinners: Epoxy Thinners
Cleaner: W.S.B.C.
Shelf Life: 12 months
Nozzle pressure: 15-20Npa
Tip size: 0.8-1.1mm
